## SPLINES FOR FOUR-POINT RATIONAL INTERPOLANTS<sup>1</sup>

A.-R. K. Ramazanov, V. G. Magomedova

For continuous functions, we construct four-point rational interpolants and, for them, rational interpolation splines. For continuous functions, continuously differentiable functions, and their derivatives up to the second order, we obtain convergence bounds for such splines and their derivatives.

Keywords: splines, interpolation splines, rational splines.
