

## CONTENT OF VOLUME 17, 2011

	No.	Pp.
<b>A. L. Ageev, T. V. Antonova.</b> On ill-posed problems of localization of singularities.....	3	30-45
<b>R. R. Akopyan.</b> Best approximation of the operator of analytic continuation on the class of functions analytic in a strip.....	3	46-54
<b>N. Yu. Antonov.</b> Note on estimates for the growth order of sequences of multiple rectangular Fourier sums.....	3	55-59
<b>S. Aseev, K. Besov, S.-E. Ollus, T. Palokangas</b> Optimal growth in a two-sector economy.....	2	271-299
<b>V. F. Babenko, N. V. Parfinovich.</b> Kolmogorov-type inequalities for the norms of Riesz derivatives of multivariable functions and some applications.....	3	60-70
<b>V. M. Badkov.</b> Estimates of the Lebesgue function of Fourier sums over trigonometric polynomials orthogonal with a weight not belonging to the spaces $l^r$ ( $r > 1$ ).....	2	71-82
<b>N. V. Baidakova.</b> Influence of smoothness on the error of approximation of derivatives under local interpolation on triangulations.....	3	83-97
<b>V. S. Balaganskii.</b> On convex antiproximinal sets without farthest points.....	3	98-104
<b>V. A. Baranskii, T. A. Sen'chonok.</b> Chromatic uniqueness of elements of height $\leq 3$ in lattices of complete multipartite graphs.....	4	3-18
<b>A. S. Belov.</b> On the extremal problem about the minimum of the free term of a nonnegative trigonometric polynomial.....	3	105-121
<b>V. A. Belonogov.</b> On irreducible characters of the group $S_n$ that are semiproportional on $A_n$ or $S_n \setminus A_n$ . VII.....	1	3-16
<b>V. A. Belonogov.</b> Small interactions in the groups $Sp_4(q)$ for even $q$ .....	4	19-37
<b>V. V. Belyaev.</b> Wreath products of finitary permutation groups.....	4	38-43
<b>V. I. Berdyshev.</b> Object and observer: A surveillance problem.....	2	7-19
<b>M. S. Blizorukova.</b> On the reconstruction of the trajectory and control in a nonlinear second-order system.....	1	17-26
<b>D. S. Bykov, Yu. F. Dolgii.</b> Canonical approximations in the problem of optimal stabilization of autonomous systems with aftereffect.....	2	20-34
<b>Carl de Boor</b> On the (bi)infinite case of Shadrin's theorem Concerning the $L_\infty$ -boundedness of the $L_2$ -spline projector.....	3	24-29
<b>A. G. Chentsov.</b> Ultrafilters of measurable spaces as generalized solutions in abstract attainability problems.....	1	268-293
<b>A. G. Chentsov.</b> One representation of the results of action of approximate solutions in a problem with constraints of asymptotic nature.....	2	225-239

<b>A. G. Chentsov.</b> On one example of representing the ultrafilter space for an algebra of sets .....	4	293-311
<b>F. L. Chernous'ko.</b> Optimal motion of a multilink system in a resistive medium	2	240-255
<b>Nikolai Ivanovich Chernykh.</b> On the occasion of his 75th birthday .....	3	15-18
<b>A. A. Chikrii, I. I. Matichin.</b> On linear conflict-controlled processes with fractional derivatives .....	2	256-270
<b>P. A. Chistyakov.</b> Iterative methods for solving linear operator equations in Banach spaces .....	3	303-318
<b>A. A. Davydov, T. S. Shutkina.</b> Uniqueness of a cycle with discounting that is optimal with respect to the average time profit .....	2	80-87
<b>M. V. Deikalova.</b> Several extremal approximation problems for the characteristic function of a spherical layer .....	3	122-135
<b>Yu. F. Dolgii, P. G. Surkov.</b> Ill-posed problem of reconstructing the population magnitude in Hutchinson's mathematical model .....	1	70-84
<b>A. A. Duzh, A. A. Shlepkina.</b> On a periodic Shunkov group saturated by direct products of finite elementary abelian 2-groups and $L_2(2^n)$ .....	2	83-87
<b>A. I. Egorov, L. N. Znamenskaya.</b> On the controllability of elastic oscillations of serially connected objects with distributed parameters .....	1	85-92
<b>A. V. Efimov.</b> A version of the Turan problem for positive definite functions of several variables .....	3	136-154
<b>M. E. Eliseev.</b> On autotopies of quasigroups .....	1	93-98
<b>V. E. Fedorov, M. V. Plekhanova.</b> The problem of start control for a class of semilinear distributed systems of Sobolev type .....	1	259-267
<b>A. L. Gavrilyuk.</b> Investigation of parameters of a point locomotive communication link .....	1	38-52
<b>N. L. Grigorenko, D. V. Kamzolkin, L. N. Luk'yanova.</b> Numerical algorithm for solving a nonstationary problem of optimal control .....	1	53-59
<b>N. L. Grigorenko, D. V. Kamzolkin, L. N. Luk'yanova, D. G. Pivovarchuk.</b> On one class of control problem under uncertainty .....	2	71-79
<b>A. A. Gryzlov, E. S. Bastrykov.</b> Some centered systems of sets and points defined by them .....	4	76-82
<b>M. I. Gusev.</b> On external estimates for reachable sets of nonlinear control systems .....	1	60-69
<b>A. D. Gvishiani, S. M. Agayan, Sh. R. Bogoutdinov, A. I. Kagan.</b> Gravitational smoothing of time series .....	2	62-70
<b>V. A. Il'in.</b> On the complete damping of oscillations of an inhomogeneous rod by means of a boundary control at one end .....	2	88-96
<b>A. V. Ipatov.</b> Improved method of simulated annealing for solving the vehicle routing problem .....	4	121-125
<b>E. E' Ivanko.</b> Sufficient stability conditions in the traveling salesman problem.	3	155-168
<b>V. A. Kim.</b> Sharp Lebesgue constants for interpolatory $\mathcal{L}$ -splines of a formally self-adjoint differential operator .....	3	169-177

<b>V. N. Knyagina, V. S. Monakhov.</b> On the permutability of maximal subgroups with Schmidt subgroups.....	2	126-133
<b>V. A. Koibaev.</b> Elementary nets.....	2	134-141
<b>A. S. Kondrat'ev, A. A. Makhnev.</b> International Conference on Algebra and Geometry Dedicated to the 80th Birthday A.I. Starostin .....	4	321-325
<b>A. S. Kondrat'ev, I. V. Khramtsov.</b> On finite triprimary groups.....	4	142-159
<b>S. V. Konyagin, A. Yu. Popov.</b> On the reconstruction of functions by the values of the $n$ th differences with step $1/n$ .....	3	178-185
<b>F. G. Korablev.</b> Uniqueness of knot roots in $F \times I$ and prime decompositions of virtual knots .....	4	160-175
<b>L. F. Korkina, M. A. Rekant.</b> Some classes of functions of a linear closed operator .....	3	186-200
<b>A. I. Korotkii, E. I. Gribanova.</b> Reconstruction of controls in hyperbolic systems by Tikhonov's method with nonsmooth stabilizers .....	1	99-108
<b>A. A. Koshelev.</b> The best $L_p$ approximation of the Laplace operator by linear bounded operators in the classes of functions of two and three variables .....	3	217-224
<b>E. K. Kostousova, V. I. Pochinskii.</b> On problems of putting a carrier rocket into specified elliptic orbits.....	3	201-216
<b>N. N. Krasovskii, A. N. Kotel'nikova.</b> Stochastic guide for a time-delay object in a positional differential game .....	2	97-104
<b>A. V. Kryazhimskii.</b> Numerical encoding of sampled controls and an approximation metric criterion for the solvability of an aiming game problem ...	2	105-124
<b>N. A. Kuklin.</b> The form of an extremal function in the Delsarte problem of finding an upper bound for the kissing number in the three-dimensional space ..	3	225-232
<b>A. A. Kuznetsov.</b> On a subgroup of the Burnside group $B_0(2, 5)$ .....	4	176-180
<b>N. V. Latypova.</b> Independence of error estimates of interpolation by cubic polynomials from the angles of a triangle.....	3	233-241
<b>I. V. Lemeshev, V. S. Monakhov.</b> Finite groups with decomposable cofactors of maximal subgroups.....	4	181-188
<b>A. M. Lipanov.</b> On the method of overcoming singular points in the solution of transcendental equations .....	1	109-120
<b>A. A. Makhnev, N. V. Chuksina.</b> On automorphisms of a strongly regular graph with parameters $(210, 95, 40, 45)$ .....	4	199-208
<b>A. A. Makhnev, D. V. Paduchikh.</b> On graphs in which neighborhoods of vertices are isomorphic to the Higman–Sims graph .....	4	189-198
<b>V. I. Maksimov.</b> On the reconstruction of inputs in linear parabolic equations	2	125-135
<b>G. I. Marchuk, V. P. Shutyaev.</b> Adjoint equations and iterative algorithms in problems of variational data assimilation .....	2	136-150
<b>S. V. Medvedev.</b> Some properties of the spaces $T(k, \tau)$ and $S(k, \tau)$ .....	4	209-221
<b>E. I. Moiseev, A. A. Kholomeeva.</b> Optimal boundary control by displacement at one end of a string under a given elastic force at the other end.....	2	151-158

<b>E. A. Neganova, V. I. Trofimov.</b> On symmetrical 4-extensions of the 2-dimensional grid .....	3	242-257
<b>E. A. Neganova.</b> On symmetrical 4-extensions of the grid $\Lambda^2$ .....	4	222-243
<b>M. S. Nikol'skii.</b> On controllable variants of the Richardson model in political science .....	1	121-128
<b>M. S. Nirova.</b> Strongly $(s-2)$ -uniform extensions of partial geometries $pG_\alpha(s, t)$ .....	4	244-257
<b>S. I. Novikov.</b> Interpolation in a ball with a minimum value of the $L_p$ -norm of the Laplace operator .....	3	258-265
<b>A. V. Osipov.</b> Properties of the $\mathbf{C}$ -compact-open topology on a function space .....	4	258-277
<b>Yu. S. Osipov, A. V. Kryazhimskii, V. I. Maksimov.</b> Some algorithms for the dynamic reconstruction of inputs .....	1	129-161
<b>E. A. Panasenko, L. I. Rodina, E. L. Tonkov.</b> The space $\text{oclcv}(\mathbb{R}^n)$ with the Hausdorff–Bebutov metric and differential inclusions .....	1	162-177
<b>Yu. V. Parysheva.</b> Asymptotics of a solution to a linear optimal control problem in the singular case .....	3	266-270
<b>O. E. Perminova.</b> On finite critical lattices. II .....	4	278-292
<b>V. G. Pimenov, A. B. Lozhnikov.</b> Difference schemes for the numerical solution of the heat conduction equation with aftereffect .....	1	178-189
<b>D. K. Potapov.</b> Control of spectral problems for equations with discontinuous operators .....	1	190-200
<b>A. V. Raigorodskaya.</b> Equilibrium behaviors of the players in an infinitely repeated $2 \times 2$ $\varepsilon$ -best response game .....	1	201-216
<b>V. L. Rozenberg.</b> On the problem of continuous estimation of a disturbance in a stochastic differential equation .....	1	217-228
<b>T. A. Sen'chonok, V. A. Baransky.</b> Classification of elements of small height in lattices of complete multipartite graphs .....	2	159-173
<b>T. A. Sen'chonok.</b> Chromatic uniqueness of elements of height 2 in lattices of complete multipartite graphs .....	3	271-281
<b>A. Yu. Shadrin.</b> Several sketches in a spline tonality .....	3	19-23
<b>L. V. Shalaginov.</b> On Deza graphs with parameters of triangular graphs .....	1	294-298
<b>V. T. Shevaldin.</b> Two-scale relations for analogs of basis splines of small degrees .....	3	319-323
<b>D. A. Shved.</b> Finitary automorphisms of semisimple groups .....	4	312-315
<b>I. E. Simonov.</b> Sharp Markov brothers type inequality in the spaces $L_p, L_1$ on a closed interval .....	3	282-290
<b>A. A. Solov'ev.</b> Modeling dynamics of block-and-fault systems and seismicity .....	2	174-190
<b>E. V. Strelkova, V. T. Shevaldin.</b> Form preservation under approximation by local exponential splines of an arbitrary order .....	3	291-299
<b>Yu. N. Subbotin, S. A. Telyakovskii.</b> On relative widths of classes of differentiable functions. III .....	2	300-302
<b>Yu. N. Subbotin and N. I. Chernykh's joint research activities</b> .....	3	5-7

<b>Yurii Nikolaevich Subbotin.</b> On the occasion of his 75th birthday.....	3	9-13
<b>N. N. Subotina, L. G. Shagalova.</b> On solving the Cauchy problem for the Hamilton–Jacobi equation with phase constraints.....	2	191-208
<b>M. I. Sumin.</b> Dual regularization and Pontryagin’s maximum principle in a problem of optimal boundary control for a parabolic equation with nondifferentiable functionals.....	1	229-244
<b>V. V. Tarkaev.</b> On the cubic complexity of three-dimensional polyhedra.....	1	245-250
<b>V. I. Trofimov</b> Symmetrical extensions of graphs and some other topics in graph theory related with group theory.....	4	316-320
<b>V. I. Ukhobotov, D. V. Gushchin.</b> Single-type differential games with convex integral payoff.....	1	251-258
<b>V. N. Ushakov, A. A. Uspenskii, A. G. Malev.</b> Estimate of the stability defect for a positional absorption set subjected to discriminant transformations.	2	209-224
<b>F. P. Vasil’ev, E. V. Khoroshilova, A. S. Antipin.</b> Regularized extragradient method for finding a saddle point in an optimal control problem.....	1	27-37
<b>S. N. Vasil’ev, G. M. Ponomarev.</b> Automatization methods for logical deduction and their application in the control of dynamic and intelligent systems	2	35-52
<b>V. V. Vasin, G. Ya. Perestoronina.</b> Levenberg–Marquardt method and its modified versions for solving nonlinear equations with application to the inverse gravimetry problem.....	2	53-61
<b>E. P. Vdovin, N. Ch. Manzaeva, D. O. Revin.</b> On the heritability of the property $D_\pi$ by subgroups.....	4	44-52
<b>B. M. Veretennikov.</b> On finite Alperin $p$ -groups with homocyclic commutator subgroup.....	4	53-65
<b>M. Yu. Vyplov.</b> A generalization of the Birkhoff–Whitney theorem for hereditary systems.....	4	66-75
<b>A. Kh. Zhurtov, A. A. Tsirkhov.</b> Finite groups with independent abelian subgroups.....	4	88-91
<b>M. R. Zinov’eva.</b> Recognizability by spectrum of simple groups $C_p(2)$ .....	4	102-113
<b>V. I. Zenkov.</b> On intersections of Sylow 2-subgroups in automorphism groups of finite simple groups of exceptional Lie type.....	4	92-101
<b>N. D. Zyulyarkina.</b> On the commutation graph of cyclic $TI$ -subgroups in linear groups.....	4	114-120
