CONTENT OF VOLUME 18, 2012

	No.	Pp.
A. L. Ageev, T. V. Antonova. On the localization of singularities of the first kind for a function of bounded variation	1	56–68
A. L. Ageev, V. V. Arestov, V. V. Vasin. International Conference "Algorithmic Analysis of Unstable Problems (AAUP-2011)"	1	329–333
R. R. Akopyan. Best approximation for the analytic continuation operator on the class of analytic functions in a ring	4	3–13
R. A. Aliev, A. F. Amrakhova. A constructive method for the solution of integral equations with Hilbert kernel	4	14–25
B. Amberg, L. S. Kazarin. ABA-groups with cyclic subgroup B	3	10–22
S. A. Anikin. On the statistical stability of input identification problems for dynamic systems	2	9–21
N. Yu. Antonov. On the growth order of sequences of double rectangular Fourier sums for functions from the classes $\varphi(L)$	4	26–34
A. S. Apartsin. Polynomial Volterra equations of the first kind and the Lambert function	1	69–81
V. V. Arestov, M. A. Filatova. On the approximation of the differentiation operator by linear bounded operators on the class of twice differentiable functions in the $L_2(0,\infty)$	4	35–50
A. G. Babenko, Yu. V. Kryakin, V. A. Yudin. One-sided approximation in L of the characteristic function of an interval by trigonometric polynomials	1	82–95
A. G. Babenko, N. Dolmatova,Yu. V. Kryakin. Jackson's exact inequality with a special module of continuity	4	51–67
Vl.M. Badkov. Trigonometric analogs of the Szegő equiconvergence theorem for Fourier–Jacobi series	4	68–79
N. V. Baidakova. Upper estimates for the error of approximation of derivatives in a finite element of Hsieh–Clough–Tocher type	4	80–89
A. B. Bakushinskii, M. M. Kokurin, M. Yu. Kokurin. On a complete discretization scheme for an ill-posed Cauchy problem in a Banach space	1	96–108
V. S. Balaganskii. On antiproximinal sets in Grothendieck spaces	4	90–103
N. A. Baraboshkina, V. M. Pleshchev, N. I. Chernykh. Synthesis of electromagnetic field on an antenna array	4	104–109
V. A. Belonogov. On the conjecture about semiproportional characters in the groups $\mathrm{Sp}_4(q)$	3	30–46
V. V. Belyaev. Finitary permutation groups and the topology of pointwise convergence	3	47–55

Yu. I. Berdyshev. On some problems of choosing the order in which a control system approaches a group of objects . . . 3 56–66

V. I. Berdyshev. Concealment characteristics for a moving object . . . 4 110–119

M. S. Blizorukova, V. I. Maksimov. On a reconstruction algorithm for the trajectory and control in a delay system . . . 1 109–122

D. I. Borisov. On a $\mathcal{PT}$-symmetric waveguide with a pair of small holes . . . 2 22–37

D. S. Bykov, Yu. F. Dolgii. Error estimate for approximations of an optimal stabilizing control in a delay system . . . 2 38–47

A. A. Chentsov, A. G. Chentsov. On a routing problem with internal tasks . 1 298–317

A. A. Chentsov, A. G. Chentsov. On an iterative procedure for solving a routing problem with constraints . . . 3 261–281

A. G. Chentsov. Tier mappings and ultrafilter-based transformations . . . 4 298–314

N. S. Chernikov. Three S. N. Chernikov's questions . . . 3 23–25

P. A. Chistiakov. Multistep iterative method for solving linear operator equations in Banach spaces . . . 1 318–328

A. R. Danilin, O. O. Kovrizhnykh. Asymptotic representation of a solution to a singular perturbation linear time-optimal problem . . . 2 67–79

A. R. Danilin, A. P. Zorin. Asymptotics of a solution to an optimal boundary control problem in a bounded domain . . . 3 75–82

M. V. Deikalova, V. V. Rogozina. Jackson — Nikol'skii inequality between the uniform and integral norms of algebraic polynomials on a Euclidean sphere . . . 4 162–171

A. M. Denisov. Inverse problem for a hyperbolic equation with a nonlocal boundary condition containing a delay argument . . . 1 139–146

K. S. Efimov. Classification of amply regular graphs with $b_1 = 6$ . . . 3 90–98

A. V. Efimov. An analog of Rudin's theorem for continuous radial positive definite functions of several variables . . . 4 172–179

A. E. El'bert. Asymptotic analysis of the diffusion–absorption equation with fast and strongly oscillating absorbtion coefficient in the two-dimensional case . . 2 305–311

K. V. Emel'yanov. Difference fitting scheme for a singularly perturbed problem with turning point . . . 2 80–91

I. I. Eremin,A. A. Makhnev. On the 100th Birthday of Sergei Nikolaevich Chernikov . . . 3 5–9

I. I. Eremin, L. D. Popov. Interior penalty functions and duality in linear programming . . . 3 83–89

A. A. Ershov. Asymptotic expansion of the Dirichlet problem with Laplace equation outside a thin disk . . . 2 92–107

M. V. Falaleev, S. S. Orlov. Generalized solutions of singular integro-differential equations in Banach spaces and their applications . . . 4 286–197

M. R. Gabdullin. An estimate of the geometric mean of the derivative of a polynomial in terms of its uniform norm on a closed interval . . . 4 153–161

R. N. Garifullin. Autoresonance excitation of a soliton of the nonlinear Schrödinger equation . . . 2 62–66

A. Hasanov. Some new classes of inverse coefficient problems in nonlinear mechanics . . . 1 20–33

B. Hofmann, P. Mathé. Some note on the modulus of continuity for ill-posed problems in Hilbert space . . . 1 34–41

I. I. Ivanko. A stability criterion for optimal solutions of a minimax problem about a partition into an arbitrary number of subsets under varying cardinality of the initial set . . . 4 180-194

S. I. Kabanikhin, M. A. Shishlenin. On the use of a priori information in coefficient inverse problems for hyperbolic equations . . . 1 147–164

V. V. Kabanov, A. V. Mityanina. Strictly Deza line graphs . . . 1 165–177

L. A. Kalyakin. Analysis of the Bloch equations for the nuclear magnetization model . . . 2 123–140

A. L. Kazakov. Application of characteristic series for constructing solutions of nonlinear parabolic equations and systems with degeneracy . . . 2 114–122

M. Yu. Khachai, M. I. Poberii. The computational complexity and approximability of a series of geometric covering problems . . . 3 247–260

A. P. Khromov, G. V. Khromova. On the convergence of the Lavrent'ev method for an integral equation of the first kind with involution . . . 1 289–297

O. M. Kiselev. Oscillations near a separatrix in the Duffing equation . . . 2 141–153

V. N. Knyagina, V. S. Monakhov. On the permutability of n-maximal subgroups with Schmidt subgroups . . . 3 125–130

A. S. Kondrat'ev. Finite groups having the same prime graph as the group $Aut(J_2)$ . . . 3 131–138

A. S. Kondrat'ev, I. V. Khramtsov. The complete reducibility of some $GF(2)A_7$-modules . . . 3 139–143

A. I. Korotkii, E. I. Gribanova. Reconstruction of boundary controls in hyperbolic systems . . . 2 154–169

A. I. Korotkii, D. O. Mikhailova. Reconstruction of boundary controls in parabolic systems . . . 1 178–197

E. K. Kostousova. On polyhedral estimates for reachable sets of differential systems with bilinear uncertainty . . . 4 195–210

N. A. Kuklin. Delsarte method in the problem on kissing numbers in high-dimensional spaces . . . 4 224–239

S. V. Kuznetsov, K. S. Tikhanovtseva. Nonnegativity set of smallest measure for polynomials with zero weighted mean value on a closed interval . . . 4 211–223

E. F. Lelikova. On the asymptotics of a solution to an equation with a small parameter at some of the highest derivatives . . . 2 170–178

A. S. Leonov. Higher-order total variations for functions of several variables and their application in the theory of ill-posed problems . . . 1 198–212

A. M. Lipanov, M. R. Koroleva, S. Yu. Dadikina. Adapted cylindrical coordinates for internal volumes of structural elements of a solid-propellant rocket engine . . . 1 213–221

D. V. Luk'yanenko, A. G. Yagola. Application of multiprocessor systems for solving inverse problems leading to Fredholm integral equations of the first kind 1 222–234

A. A. Makhnev, D. V. Paduchikh. Graphs in which neighborhoods of vertices are isomorphic to the Mathieu graph 3 155–163

A. A. Makhnev, L. Yu. Tsiovkina. On automorphisms of a distance-regular graph with intersection array $\{35, 32, 8; 1, 2, 28\}$ 1 235–241

J. I. Mamedkhanov. On S.M. Nikol'skii type inequalities between different metrics 4 240–248

V. D. Mazurov, A. I. Smirnov. Interpretation of contradictory images by means of systems of linear inequalities 3 144–154

N. V. Medvedev, S. S. Titov. On the topology of elliptic curves 1 242–250

I. V. Melnikova, M. A. Alshanskiy. The generalized well-posedness of the Cauchy problem for an abstract stochastic equation with multiplicative noise 1 251–267

I. T. Mukhamet'yanov. On distance-regular graphs on the set of nontrivial p-elements of the group $L_2(p^n)$ 3 164–178

A. L. Myl'nikov. Graphs of twisted subsets 3 179–186

M. S. Nirova. On strongly regular graphs with $b_1 < 24$ 3 187–194

S. I. Novikov. Interpolation on a square with a minimum value of the uniform norm of the Laplace operator 4 249–257

V. Yu. Novokshenov. Special solutions of the first and second Painlevé equations and singularities of the monodromy data manifold 2 179–190

Ya. N. Nuzhin. Lie rings defined by the root system and family of additive subgroups of the main ring 3 195–200

A. V. Osipov. On the completeness properties of the C-compact-open topology on $C(X)$ 2 191–198

G. P. Panasenko. Partial asymptotic decomposition of the domain for the diffusion–discrete absorption equation 2 205–211

V. S. Parfenenkova. Investigation of stochastic problems of mathematical physics 2 212–221

V. N. Pavlenko, T. A. Petrash. Periodic solutions of the vibrating string equation with Neumann and Dirichlet boundary conditions and a discontinuous nonlinearity 2 199–204

I. V. Pershin. Asymptotics of a solution to the heat equation with a singularity at the boundary 1 268–272

V. G. Pimenov, E. E. Tashirova. Numerical methods for solving a hereditary equation of hyperbolic type 2 222–231

L. D. Popov. Iterative methods for equilibrium search in the partial Arrow–Debreu–Stone exchange model 3 201—207

A. L. Popovich. Representation of lattices by congruence lattices of semigroups without idempotents 3 208–217

E. A. Rogozinnikov. On the possibility of constructing a curve for a given group of homeomorphisms 3 218–229

V. G. Romanov. Two-dimensional problem for an integrodifferential equation of electrodynamics . . . 1 273–280

L. I. Rubina, O. N. Ul'yanov. Solution of nonlinear partial differential equations by the geometric method . . . 2 265–280

V. M. Selkin. Factorizations theory of one-generated Bear ω-local formations . 2 232–237

M. Sh. Shabozov, G. A. Yusupov. On the exact values of mean ν-widths of some classes of entire functions . . . 4 315–327

V. Yu. Shaprynskii. The periodicity of special elements in the lattice of semigroup varieties . . . 3 282–286

G. I. Shishkin. Conditioning of a difference scheme of the solution decomposition method for a singularly perturbed convection–diffusion equation . 2 291–304

N. A. Sidorov, D. N. Sidorov. On successive approximations of solutions of a singular Cauchy problem . . . 2 238–244

I. E. Simonov. From a Letter to the Editor . . . 4 328

V. D. Skarin. On the application of a regularization method for the correction of improper problems of convex programming . . . 3 230–241

S. A. Stasyuk. Best approximation of periodic functions of several variables from the classes $MB^{\omega}_{p,\theta}$ in the uniform metric . . . 4 258–266

Yu. N. Subbotin. One-sided widths of classes of smooth functions . . . 4 267–270

B. I. Suleimanov. Asymptotics of the Gurevich–Pitaevskii universal special solution of the Korteweg–de Vries equation as $|x| \to \infty$ . . . 2 245–253

O. A. Sultanov. Stability of autoresonance models under persistent disturbances . . . 2 254–264

V. P. Tanana, A. B. Bredikhina, T. S. Kamaltdinova. On an error estimate for an approximate solution or an inverse problem in the class of piecewise smooth functions . . . 1 281–288

V. I. Trofimov. A note on the extendability of an isomorphism of subgraphs of a graph to an automorphism of the graph . . . 3 26–29

A. A. Trofimuk. On fitting subgroups of a finite solvable group . . . 3 242–246

I. A. Tsepelev. Approximation of nonsmooth solutions of a retrospective problem for an advection–diffusion model . . . 2 281–290

V. N. Ushakov, A. A. Zimovets. On the question of the weak invariance of sets with respect to a differential inclusion generated by a control system . . . 4 271–285
