

CONTENT OF VOLUME 20, 2014

| | No. | Pp. |
|--|-----|---------|
| B.I. Ananov. On the estimation of backward stochastic differential equations . | 4 | 17–28 |
| A.S. Antipin, E.V. Khoroshilova. Optimal control with connected initial and terminal conditions | 2 | 13–28 |
| R.R. Akopyan. Best approximation of the differentiation operator on the class of functions analytic in a strip | 1 | 9–16 |
| S.M. Aseev and V.M. Veliov. Maximum principle for infinite-horizon optimal control problems under weak regularity assumptions | 3 | 41–57 |
| V.V. Arestov, P.Yu. Glazyrina. Bernstein-Szego inequality for fractional derivatives of trigonometric polynomials | 1 | 17–31 |
| A.V. Arutyunov, D.Yu. Karamzin, F.L. Pereira. Conditions of the absence of jumps in the solution to the adjoint system of the maximum principle for optimal control problems with state constraints | 4 | 29–37 |
| Yu.V. Averbukh. Universal Nash equilibria in n -person differential games | 3 | 26–40 |
| N.V. Baidakova. Lower estimates for the error of approximation of derivatives for composite finite elements with smoothness properties | 1 | 32–42 |
| V.A. Belonogov. Finite groups in which all 2-maximal subgroups are π -decomposable | 2 | 29–43 |
| I.N. Belousov. On automorphisms of a generalized hexagon of order (t, t) | 2 | 44–54 |
| V.V. Belyaev, D.A. Shved. Semisimple groups that have a faithful finitary permutation representation | 2 | 55–62 |
| V.I. Berdyshev. Linear approximation of vector functions | 4 | 38–43 |
| A.G. Chentsov. Ultrafilters of measurable spaces and their application in extension constructions | 1 | 285–304 |
| A.V. Chernov. On the smoothness of an approximated optimization problem for a Goursat-Darboux system on a varied domain | 1 | 305–321 |
| A.G. Chentsov, A.P. Baklanov. On the question of construction of an attraction set under constraints of asymptotic nature | 3 | 309–323 |
| A.G. Chentsov, E.G. Pytkeev. Some topological structures of extensions of abstract reachability problems..... | 4 | 312–?? |
| A.A. Chikrii, G.Ts. Chikrii. Matrix resolving functions in game dynamic problems | 3 | 324–333 |
| A.R. Danilin, O.O. Kovrizhnykh. Asymptotics of the optimal time in a time-optimal problem with two small parameters | 1 | 92–99 |
| A.R. Danilin. Asymptotic expansion of a solution to a singular perturbation optimal control problem on an interval with integral constraint | 3 | 76–85 |

| | | |
|--|---|---------|
| A. R. Danilin. Solution asymptotics in a problem of optimal boundary control of a flow through a part of the boundary | 4 | 116–127 |
| E.N. Demina, N.V. Maslova. Nonabelian composition factors of a finite group with arithmetic constraints to nonsolvable maximal subgroups | 2 | 122–134 |
| Yu.F. Dolgii. Linear-quadratic control problem for systems of differential equations with aftereffect | 3 | 86–97 |
| R.V. Dyba, A.R. Mirotin. Functions of bounded mean oscillation and Hankel operators on compact abelian groups | 2 | 135–144 |
| T.F. Filippova. Estimates of reachable sets of control systems with nonlinearity and parametric perturbations | 4 | 287–296 |
| I.A. Finogenko. The invariance principle for nonautonomous functional differential inclusions..... | 1 | 271–284 |
| E.Kh. Gimadi, A.M. Istomin, I.A. Rykov, O.Yu. Tsidulko. Probabilistic analysis of an approximation algorithm for the m -peripatetic salesman problem on random instances unbounded from above | 2 | 88–98 |
| E.Kh. Gimadi, A.V. Kelmanov, A.V. Pyatkin, M.Yu. Khachai. Efficient algorithms with performance estimates for some problems of finding several cliques in a complete undirected weighted graph | 2 | 99–112 |
| D.V. Gorbachev. An estimate of an optimal argument in the sharp multidimensional Jackson-Stechkin l_2 -inequality | 1 | 83–91 |
| A.I. Golikov, Yu.G. Evtushenko. Regularization and normal solutions of systems of linear equations and inequalities | 2 | 113–121 |
| M.I. Gomoyunov, N.Yu. Lukoyanov. On the stability of a procedure for solving a minimax control problem for a positional functional..... | 1 | 68–82 |
| M.I. Gomoyunov, D.V. Kornev, N.Yu. Lukoyanov. On the numerical solution of a minmax control problem with a positional functional | 3 | 58–75 |
| V.V. Gorokhovik, M.A. Trofimovich. First and second order optimality conditions in vector optimization problems with nontransitive preference relation | 4 | 81–96 |
| N.L. Grigorenko, A.V. Anisimov, L.N. Luk'yanova. Construction of a terminal control for a second-order system with phase constraints | 4 | 97–105 |
| M.I. Gusev. On elimination of state constraints in the construction of reachable sets | 4 | 106–115 |
| V.I. Ivanov, Ha Thi Min Hue. Generalized Jackson inequality in the space $L_2(\mathbb{R}^d)$ with Dunkl weight | 1 | 109–118 |
| E.E. Ivanko. Adaptive stability in combinatorial optimization problems | 1 | 100–108 |
| L.V. Kamneva, V.S. Patsko. Stable bridge construction in games with simple motions in the plane | 4 | 128–142 |
| A.L.Kazakov, P.A. Kuznetsov, L.F. Spevak. On a degenerate boundary value problem for the porous medium equation in spherical coordinates..... | 1 | 119–129 |
| K.S. Kobylkin. Lower bounds for the number of hyperplanes separating two finite sets of points A.S.Kondrat'ev. Recognizability of groups $E_7(2)$ and $E_7(3)$ by prime graph | 2 | 210–222 |
| A.S. Kondrat'ev. Recognizability of groups $E_7(2)$ and $E_7(3)$ by prime graph | 2 | 223–229 |

| | | |
|--|---|---------|
| A.S. Kondrat'ev, V.I. Trofimov. Stabilizers of vertices of graphs with primitive automorphism groups and a strong version of the Sims conjecture | 4 | 143–152 |
| V.V. Korableva. On chief factors of parabolic maximal subgroups of the groups ${}^2E_6(q^2)$ | 2 | 230–237 |
| A.I. Korotkii, Yu.V. Starodubtseva. Direct and inverse boundary value problems for models of stationary reaction-convection-diffusion | 3 | 98–113 |
| O.V. Khamisov. Deep cuts in concave and linear 0-1 programming | 2 | 294–304 |
| M.Yu. Khachai, E.D. Neznakhina. Polynomial-time approximation scheme for a Euclidean problem on a cycle covering of a graph | 4 | 297–311 |
| E.K. Kostousova. On the polyhedral method of solving problems of control strategy synthesis | 4 | 153–167 |
| N.A. Krasovskiy, A.V. Kryazhimskiy, A.M. Tarasyev. Hamilton-Jacobi equations in evolutionary games | 3 | 114–131 |
| A.V. Kryazhimskiy, N.V. Strelkovskiy. An open-loop criterion for the solvability of a closed-loop guidance problem with incomplete information. Linear control systems | 3 | 132–147 |
| A.V. Kryazhimskii, N.V. Strelkovskii. A problem of guaranteed closed-loop guidance by a fixed time for a linear control system with incomplete information. Program solvability criterion | 4 | 168–177 |
| N.A. Kuklin. The extremal function in the Delsarte problem of finding an upper bound for the kissing number in the three-dimensional space | 1 | 130–141 |
| Yu.I. Kulazhenko. Semicommutativity and properties of vectors in n -ary groups | 1 | 142–147 |
| S.S. Kumkov, S.Le Menec, V.S. Patsko. Solvability sets in a pursuit game with two pursuers and one evader | 3 | 148–165 |
| V.M. Kuntsevich. Control of a family of nonlinear dynamic systems under measurements with bounded disturbances | 4 | 178–186 |
| A.B. Kurzanskii. On a group control problem under obstacle avoidance | 3 | 166–179 |
| A.V. Lotov, A.I. Ryabikov. Multiobjective feedback control and its application to the construction of control rules for a cascade of hydroelectric power stations | 4 | 187–203 |
| N.Yu. Lukoyanov, A.R. Plaksin. On the approximation of nonlinear conflict-controlled systems of neutral type | 4 | 204–217 |
| S.V. Lutamanov. The compromise principle in many-person differential games | 1 | 148–155 |
| N.V. Maslova. On the coincidence of Grunberg-Kegel graphs of a finite simple group and its proper subgroup | 1 | 156–168 |
| V.I. Maksimov. On an input recovery problem in a linear delay system | 3 | 180–192 |
| V.I. Maksimov. On a control algorithm for a linear system with measurements of a part of coordinates of the phase vector | 4 | 218–230 |
| A.A. Makhnev, D.V. Paduchikh. On extensions of exceptional strongly regular graphs with eigenvalue 3 | 1 | 169–184 |
| A.V. Mityanina. On $K_{1,3}$ -free Deza graphs with diameter greater than 2 | 2 | 238–241 |

| | | |
|--|---|---------|
| N.V. Nagul. Classes of properties preserved under morphisms of generalizations of many-sorted algebraic systems in studying dynamics | 1 | 185–200 |
| V.V. Napalkov, A.U. Mullabaeva. On one class of differential operators and their application | 1 | 201–214 |
| M.S. Nikolskii. Study of an optimal control problem related to the Solow control model | 4 | 231–237 |
| E.M. Palchik. Finite simple groups with factorization $G = G_\pi B$, $2 \notin \pi$ | 2 | 242–249 |
| T.V. Pervukhina. On the pseudovariety generated by all finite monoids satisfying $\mathcal{R} = \mathcal{H}$ | 1 | 215–220 |
| L.A. Petrosyan, E.V. Gromova. Two-level cooperation in coalitional differential games | 3 | 193–203 |
| E.S. Polovinkin. On the weak polar cone of the solution set of a differential inclusion with conic graph | 4 | 238–246 |
| L.D. Popov. Dual approach to the application of barrier functions for the optimal correction of improper linear programming problems of the first kind ... | 1 | 231–237 |
| E.A. Pleshcheva, N.I. Chernykh. Construction of orthogonal multiwavelet bases | 1 | 221–230 |
| E.G. Pytkeev, A.G. Chentsov. On the structure of ultrafilters and properties related to convergence in topological spaces | 2 | 250–267 |
| L.I. Rubina, O.N. Ulyanov. One method for solving systems of nonlinear partial differential equations | 1 | 238–246 |
| D.A. Serkov. On the unimprovability of full-memory strategies in problems of guaranteed result optimization | 3 | 204–217 |
| V.D. Skarin. On the application of the residual method for the correction of inconsistent problems of convex programming | 2 | 268–276 |
| I.A. Sharaya. Quantifier-free descriptions for interval-quantifier linear systems | 2 | 311–323 |
| G.I. Shishkin, L.P. Shishkina. A stable standard difference scheme for a singularly perturbed convection–diffusion equation in the presence of computer perturbations | 1 | 322–333 |
| A. I. Sozutov, E. B. Durakov, E. V. Bugaeva. On certain near-domains and sharply 2-transitive groups | 2 | 277–283 |
| S.A. Stasyuk. Approximation by Fourier sums and Kolmogorov widths for classes $\mathbf{MB}_{p,\theta}^\Omega$ of periodic functions of several variables | 1 | 247–257 |
| E.V. Strelkova, V.T. Shevaldin. Local exponential splines with arbitrary knots | 1 | 258–263 |
| N.N. Subbotina, T.B. Tokmantsev. A study of the stability of solutions to inverse problems of dynamics of control systems under perturbations of initial data | 3 | 218–233 |
| N.N. Subbotina, L.G. Shagalova. Construction of a continuous minimax/viscosity solution of the Hamilton-Jacobi-Bellman equation with nonextendable characteristics | 4 | 247–257 |
| P.G. Surkov. Regularization of an ill-posed Cauchy problem for an autonomous system with delay with the use of a class of stabilizers | 3 | 234–245 |

| | | |
|--|---|---------|
| A.M. Taras'ev, A.A. Usova, W. Wang, O.V. Russkikh. Optimal trajectory construction by integration of Hamiltonian dynamics in models of economic growth under resource constraints | 4 | 258–276 |
| K.S. Tikhanovtseva. The rate of the smallest value of the weighted measure of the nonnegativity set for polynomials with zero mean value on a closed interval | 1 | 264–270 |
| A.A. Tolstonogov. Differential inclusions with unbounded right-hand side. Existence and relaxation theorems | 3 | 246–262 |
| E.L. Tonkov. Barbashin and Krasovskii's asymptotic stability theorem in application to control systems on smooth manifolds | 3 | 263–275 |
| L.Yu. Tsiovkina. On automorphisms of a distance-regular graph with intersection array $\{35, 32, 1; 1, 4, 35\}$ | 2 | 305–310 |
| V.I. Trofimov. Some remarks on symmetrical extensions of graphs | 2 | 284–293 |
| V.N. Ushakov, A.S. Lakhtin, P.D. Lebedev. Optimization of the Hausdorff distance between sets in Euclidean space | 3 | 291–308 |
| V.N. Ushakov, N.G. Lavrov, A.V. Ushakov. Construction of solutions in an approach problem of a stationary control system | 4 | 277–286 |
| A.A. Uspenskii. Calculation formulas for nonsmooth singularities of the optimal result function in a time-optimal problem | 3 | 276–290 |
| M.P. Vashchenko, Ya.S. Pronin, A.A. Shananin. A mathematical model of the economics of railway cargo transportation | 4 | 44–59 |
| V.V. Vasin, E.O. Soboleva. Separate reconstruction of solution components with singularities of various types for linear operator equations of the first kind | 2 | 63–72 |
| V.P. Vereshchagin, Yu.N. Subbotin, N.I. Chernykh. Description of a helical motion of an incompressible nonviscous fluid | 1 | 43–51 |
| V.P. Vereshchagin, Yu.N. Subbotin, N.I. Chernykh. A solution class of the Euler equation in a torus with solenoidal velocity field | 4 | 60–70 |
| A.Yu. Vesnin, V.V. Tarkaev, E.A. Fominykh. Three-dimensional hyperbolic manifolds with cusps of complexity 10 having maximal volume | 2 | 74–87 |
| Yu.S. Volkov, Yu.N. Subbotin. 50 years to Schoenberg's problem on the convergence of spline interpolation | 1 | 52–67 |
| L.A. Vlasenko, A.A. Chikrii. On a differential game in a distributed system | 4 | 71–80 |
| S.V. Zakharov. Justification of the asymptotics of solutions of the Navier-Stokes system for low Reynolds numbers | 2 | 161–167 |
| V.G. Zhadan. On a variant of a feasible affine scaling method for semidefinite programming | 2 | 145–160 |
| M.R. Zinoveva. Finite simple groups of Lie type over a field of the same characteristic with the same prime graph | 2 | 168–183 |
| N.D. Zyulyarkina, A.A. Makhnev. Automorphisms of Higman graphs with $\mu = 6$ | 2 | 184–209 |
